About Us

Who is Vista Energy and What is Our Goal?

Vista Energy LP is a Project Development, Project Management, and Professional and Technical Services firm focused on “Creating Energy Solutions” for the benefit of our Clients and our Partners.

Our worldwide expertise includes Project Feasibility Assessment, Project Development, Project Execution in all phases of the EPC lifecycle, and the delivery of world-class operating assets.

Throughout the project lifecycle, Vista Energy’s Goal is to advance the knowledge, development and execution of projects in the energy sector, and do this in a safe, environmentally sound, socially responsible, and innovative manner.

How Does Vista Energy Do This?

First and foremost by providing a superior product to our Clients, our Partners and the marketplace as a whole; second, by attracting the brightest and most motivated people in our industry; and third, by providing our team with great opportunities for personal fulfillment and success.

Our international expertise and project successes form the basis of our core business Values. These Values are represented through our actions and business practices, which are centered on:

- Safety Always
- Environmental Stewardship
- Social Responsibility
- Honesty and Fairness
- Accountability
- Results Driven
- Innovative Delivery

What is Vista Energy’s History and Experience?

Vista Energy, whose roots took hold in 1997 with the creation of Universal Technical Services, developed a successful core business providing Management and Technical Services to a multitude of energy industry sectors. These sectors include:

- Power Generation
- Petrochemicals
- Oil & Gas
- LNG
- Alternative Fuels

The firm’s principals and staff have executed a multitude of energy projects of varying industrial facility designs, and honed its experience through many years of domestic and international project assignments.

What Makes Vista Energy Stand Out?

Great people with truly outstanding skills, anchored by a management team whose “hands-on” knowledge is obtained through many years of actual project experience. We’ve lived it firsthand.

Our people are highly motivated, very skilled, and are selected on the basis of their character, leadership and technical ability, perfected by years of execution expertise on many diverse projects. Our staff support is second to none, and is the true cornerstone of the success of our teams engaged in project execution.

Where Have We Ventured?

Vista Energy has executed projects and provided services in twenty (20) countries to-date.

We have extensive experience working in different cultures, and in varied political systems, and know the challenges of project development and project execution in the international arena quite well.

Vista Energy's Capabilities

Vista Energy's contribution to Project Execution extends beyond the traditional EPC / EPCM role, including:

- Commercial and Financial Analysis, Regulatory and Market Intelligence, and Project Feasibility Evaluation
- Expert Support in Power Sale, Fuel Supply, Fuel Transport and Energy Transmission Agreements
- Basic Engineering Design and Equipment Assessment
- Turbine Optimization, Gas Compression, and Fuel Storage
- Load Dispatch Simulations and Generation Programming
- O&M Forecasting and Scheduling

Professional Services

Vista Energy provides a full range of Services and Personnel for the Energy Industry, including:

- Project Due Diligence
- Project Development
- Project Execution Planning
- Project Management
- Project Engineering
- Contracts Management
- Construction Management
- EH&S Services
- Project Cost and Schedule Control
- Commissioning and Start-Up Services and Procedures
- Scheduling and Planning
- Operations Procedures and Training
- Operations and Maintenance Services
- Technical Writing

All of our employees are specialists in their respective fields, each with a proven track record. Because our goal is to provide superior technical expertise and performance, we ensure that our employees have the right skill set, experience, and training to excel in their areas of core competency and expertise.
